

CANSKATE is a dynamic learn-to-skate program that focuses on fun, participation and basic skill development. Exciting new features include a fresh new look, new awards, great tools for coaches and most importantly a tested and proven new curriculum and delivery methods that develop stronger basic skills and develop them faster. This program also includes specific skills that pertain to hockey, ringette, speed skating and figure skating. Pre-CanSkate introduces younger children (3 to 4 years old) to the basic fundamentals of skating in a fun-filled atmosphere.

CANPOWERSKATE is an action-packed, high energy instructional power skating program geared to hockey and ringette skaters that focuses on balance, power, agility, speed and endurance. Skills, techniques and conditioning drills are taught in a progressive format that emphasizes how the skills apply to game situations. CanPowerSkate's Pre-Power is designed for young skaters, approximately 4 to 6 years of age who can stand up on skates and move forward (shuffle, walk or glide) who may not be ready for CanPowerSkate

RISINGSTAR Skaters participate in a group-based skating session, learning more advanced figure skating specific skating skills. RisingSTAR is a transitional program that continues developing the basic fundamentals taught in CanSkate and introduces exercises designed to improve edge control, glide, agility, and precision over the blade as the skater progresses into STARSkate.

STARSKATE offers opportunities for skaters of all ages to develop fundamental figure skating skills in the areas of ice dance, skating skills, free skate and interpretive skating. Skaters have the opportunity to take Skate Canada Tests through a nationally standardized testing system.

TEEN / ADULT programs offer opportunities for those who are learning to skate (Teen/Adult Learn to Skate Group Lessons), for those interested in further developing skating skills for recreational skating / exercise, or for eventually playing hockey or figure skating or for those continuing their own development in Figure Skating (Figure Skating sessions)

OFF ICE training is an essential part of a figure skater's training and develops co-ordination, motor skills, suppleness, speed, and confidence. Skaters require physical literacy beyond what they naturally have and by joining an off-ice session at least twice a week, skaters will progress their on-ice skills at a faster pace, and be able to handle the demands of jumping and spinning.
